World Bank

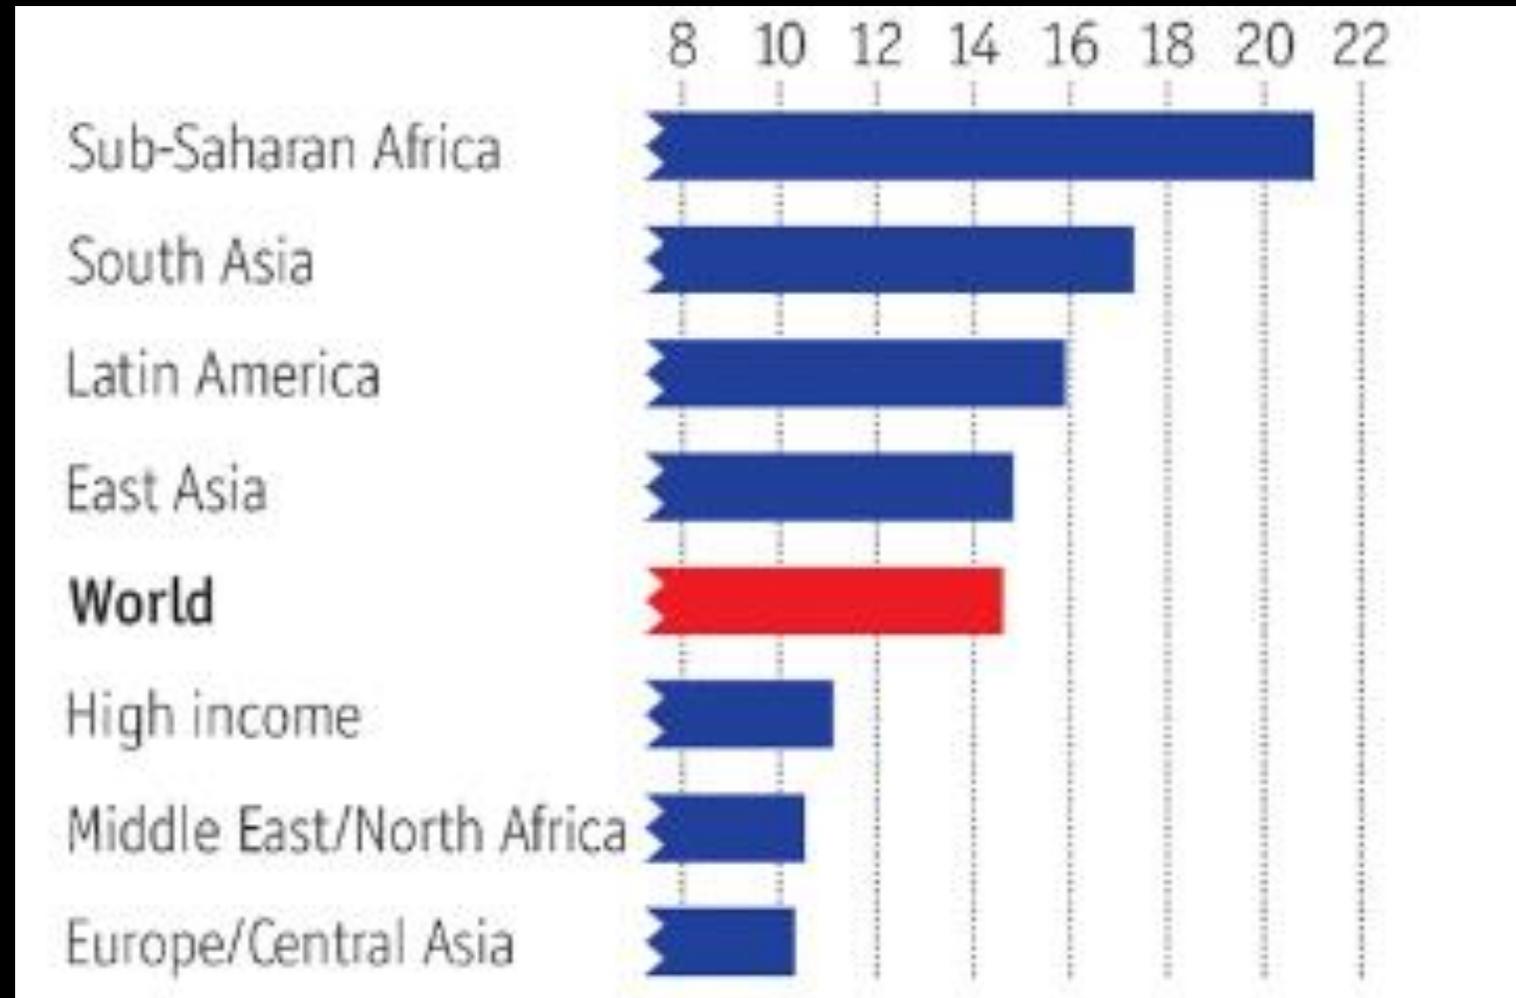

Worldwide Revolution in Schooling

But:

- 264 million out of school
- 262 million in school but can't read
- 1 in 4 young people can't read

Education and Economic Development

Rising Returns to Education

**A global effort to accelerate
more and better investments in
people for greater equity and
economic growth**

**Early health care and education
prepare children to succeed and
prosper as adults in a rapidly
changing world**

The Human Capital Project

Human Capital Index

Measurement and research

Human Capital Index: Distance to Frontier

How much human capital can a child born today expect to acquire by age 18, given the risks to poor health and poor education that prevail in the country where she lives?

Three ingredients reflect building blocks of the next generation's human capital:

SURVIVAL

Will children born today survive to school age?

SCHOOL

How much school will they complete and how much will they learn?

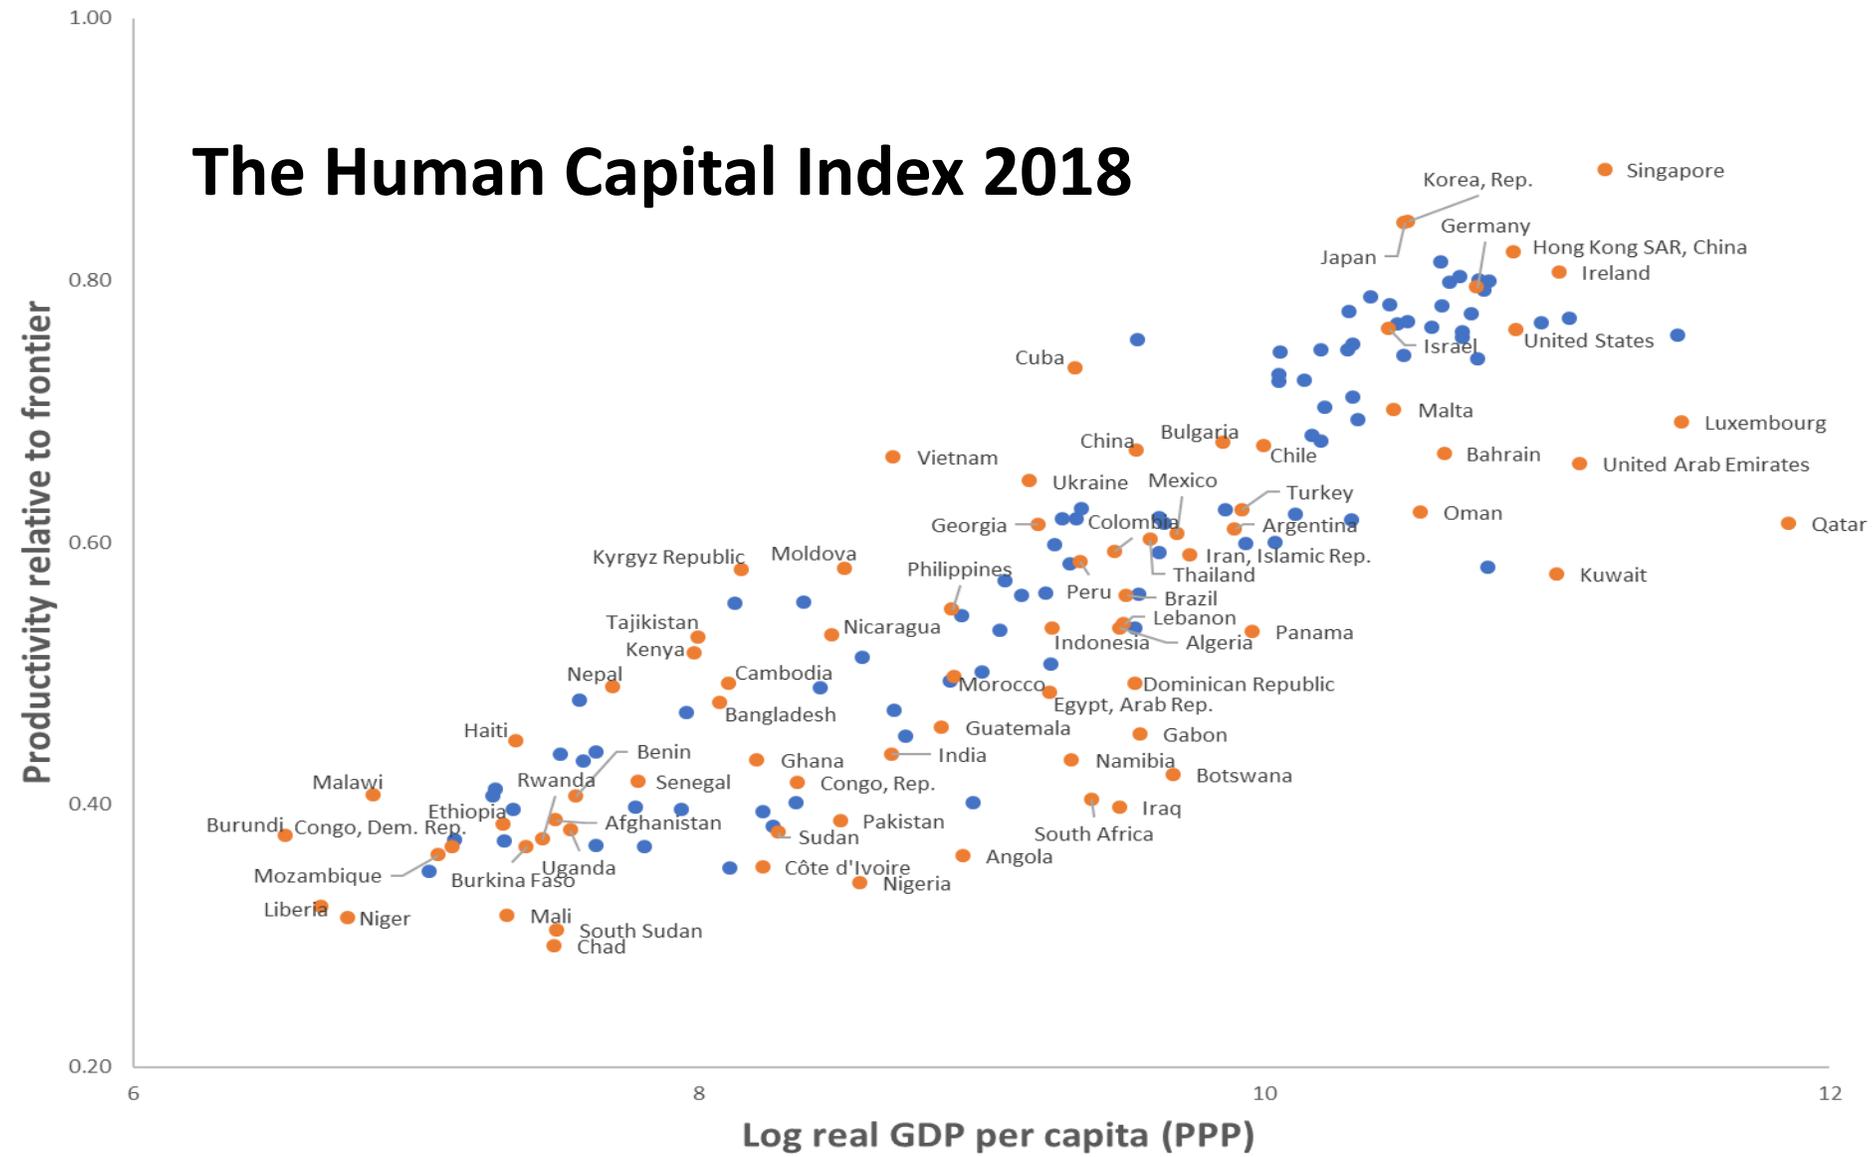

HEALTH

Will they leave school in good health, ready for further learning and/or work?

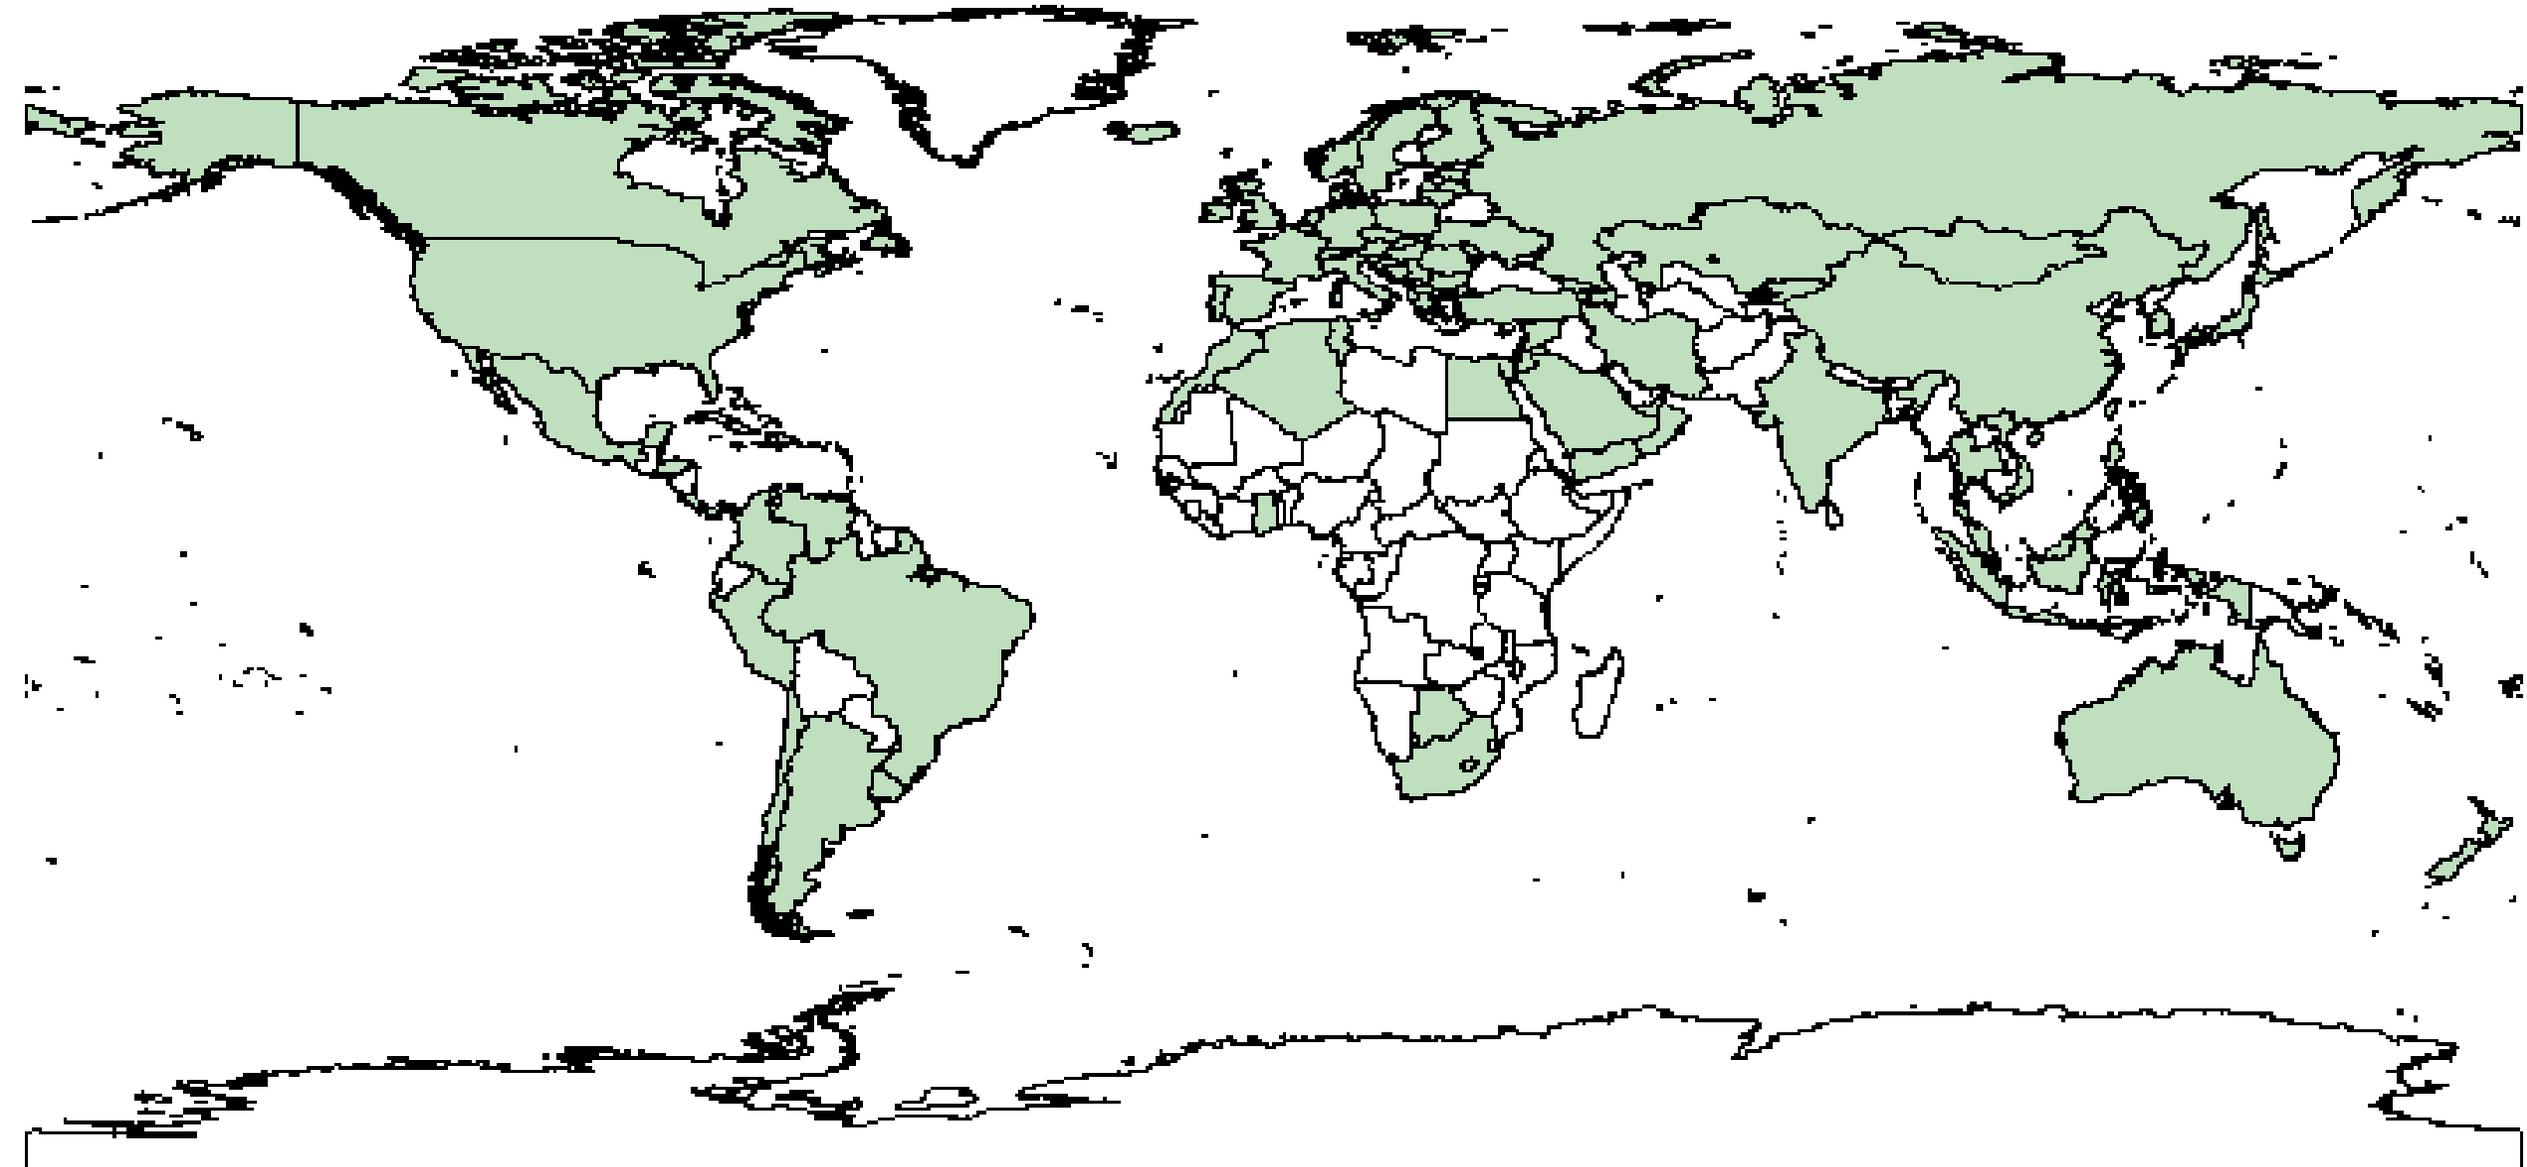

How productive will the world's children be when they are 18?

The Human Capital Index 2018

Harmonized Test Scores

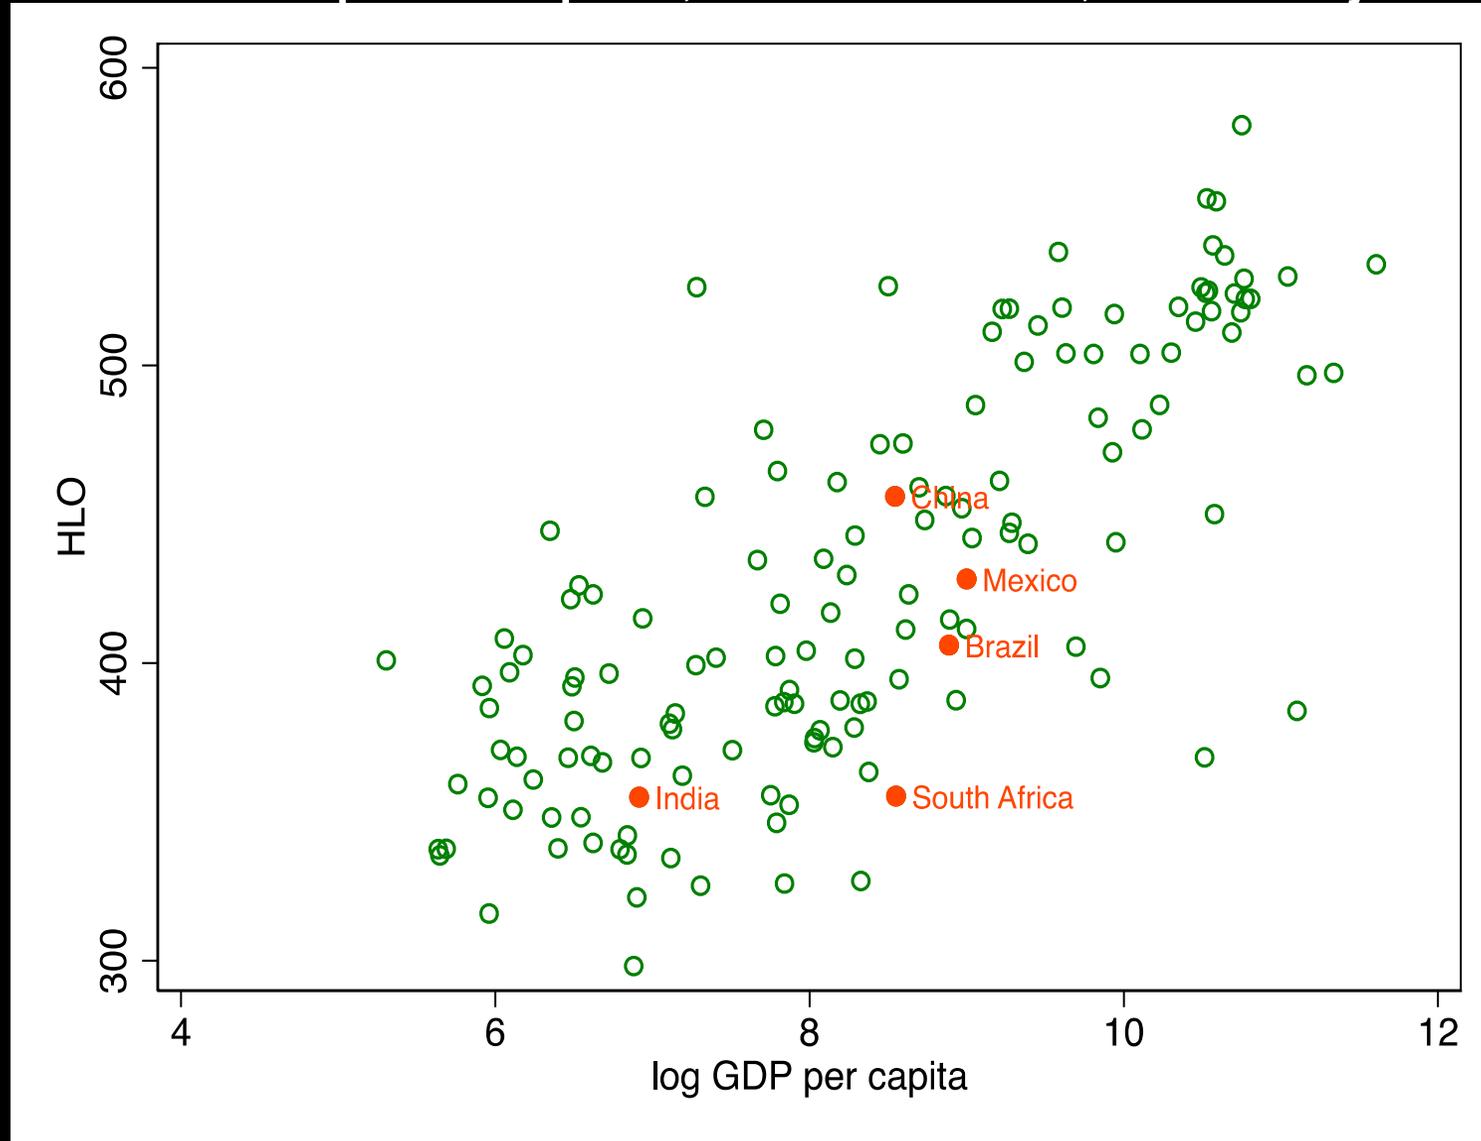

Countries Punching Above/Below Their (GDP) Weight

HLO scores vs. GDP per Capita, 2000-2017, All Subjects and Levels

Distance to the Learning Frontier for Big Economies

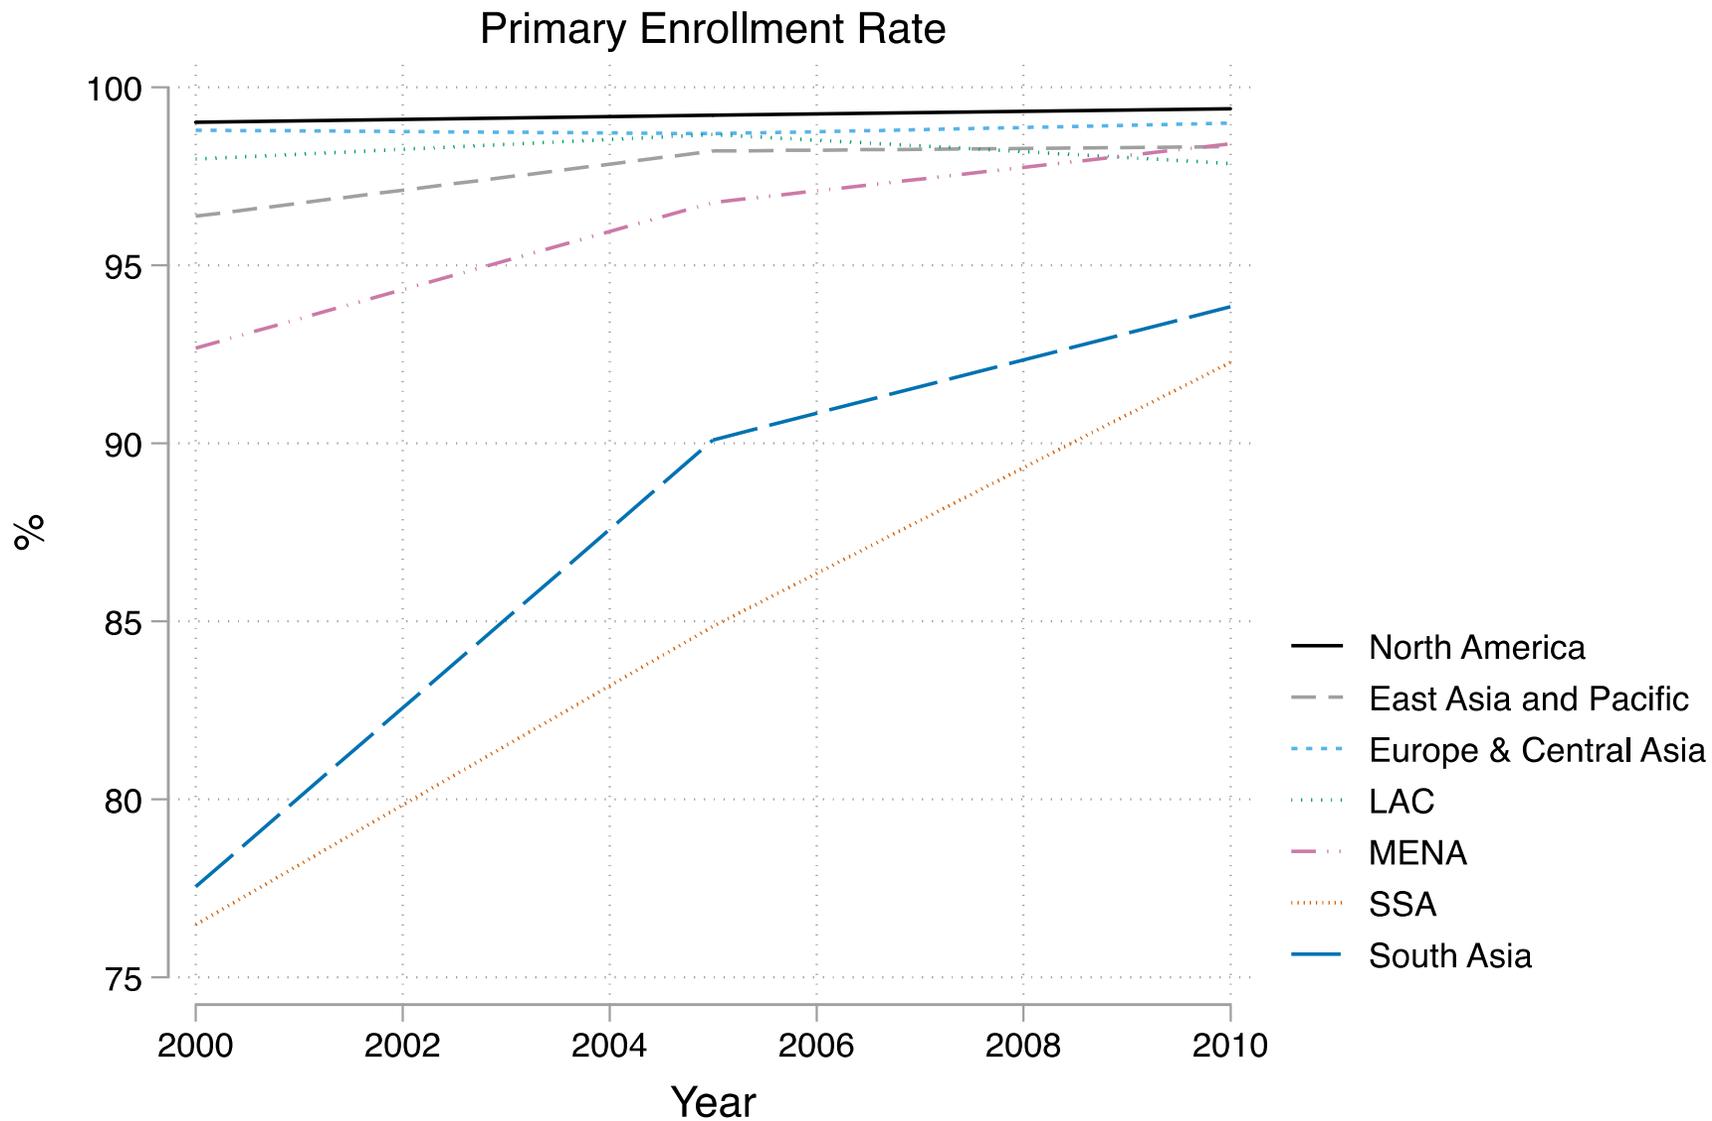

HLO scores vs. GDP per Capita, 2000-2017, All Subjects and Levels

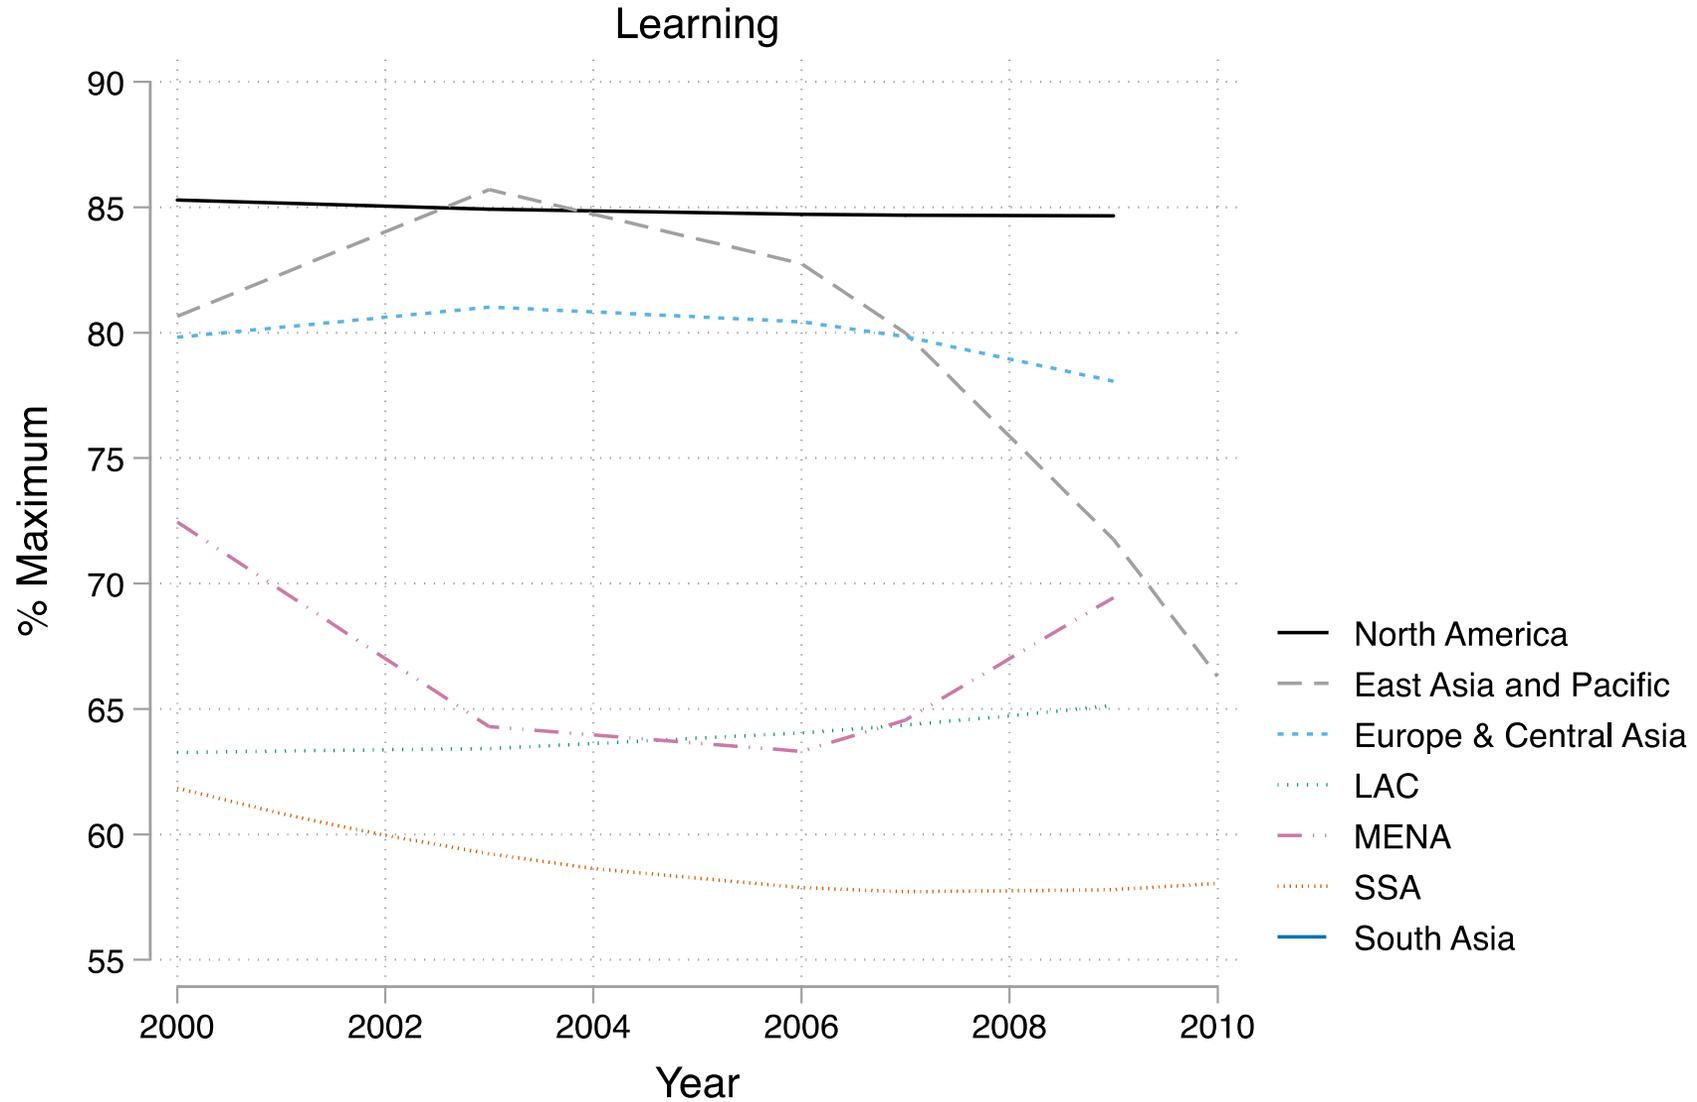

Enrollment and Learning

Notes: Primary enrollment rates are averaged for the cohorts 25 years and older. Both enrollment and learning are averaged across countries. Percent maximum is calculated by dividing scores by the score at the upper end of the scale (625) in line with Kraay (2018). Source: Primary enrollment rates are from Lee and Lee (2016); Learning outcomes are from our database.

Learning

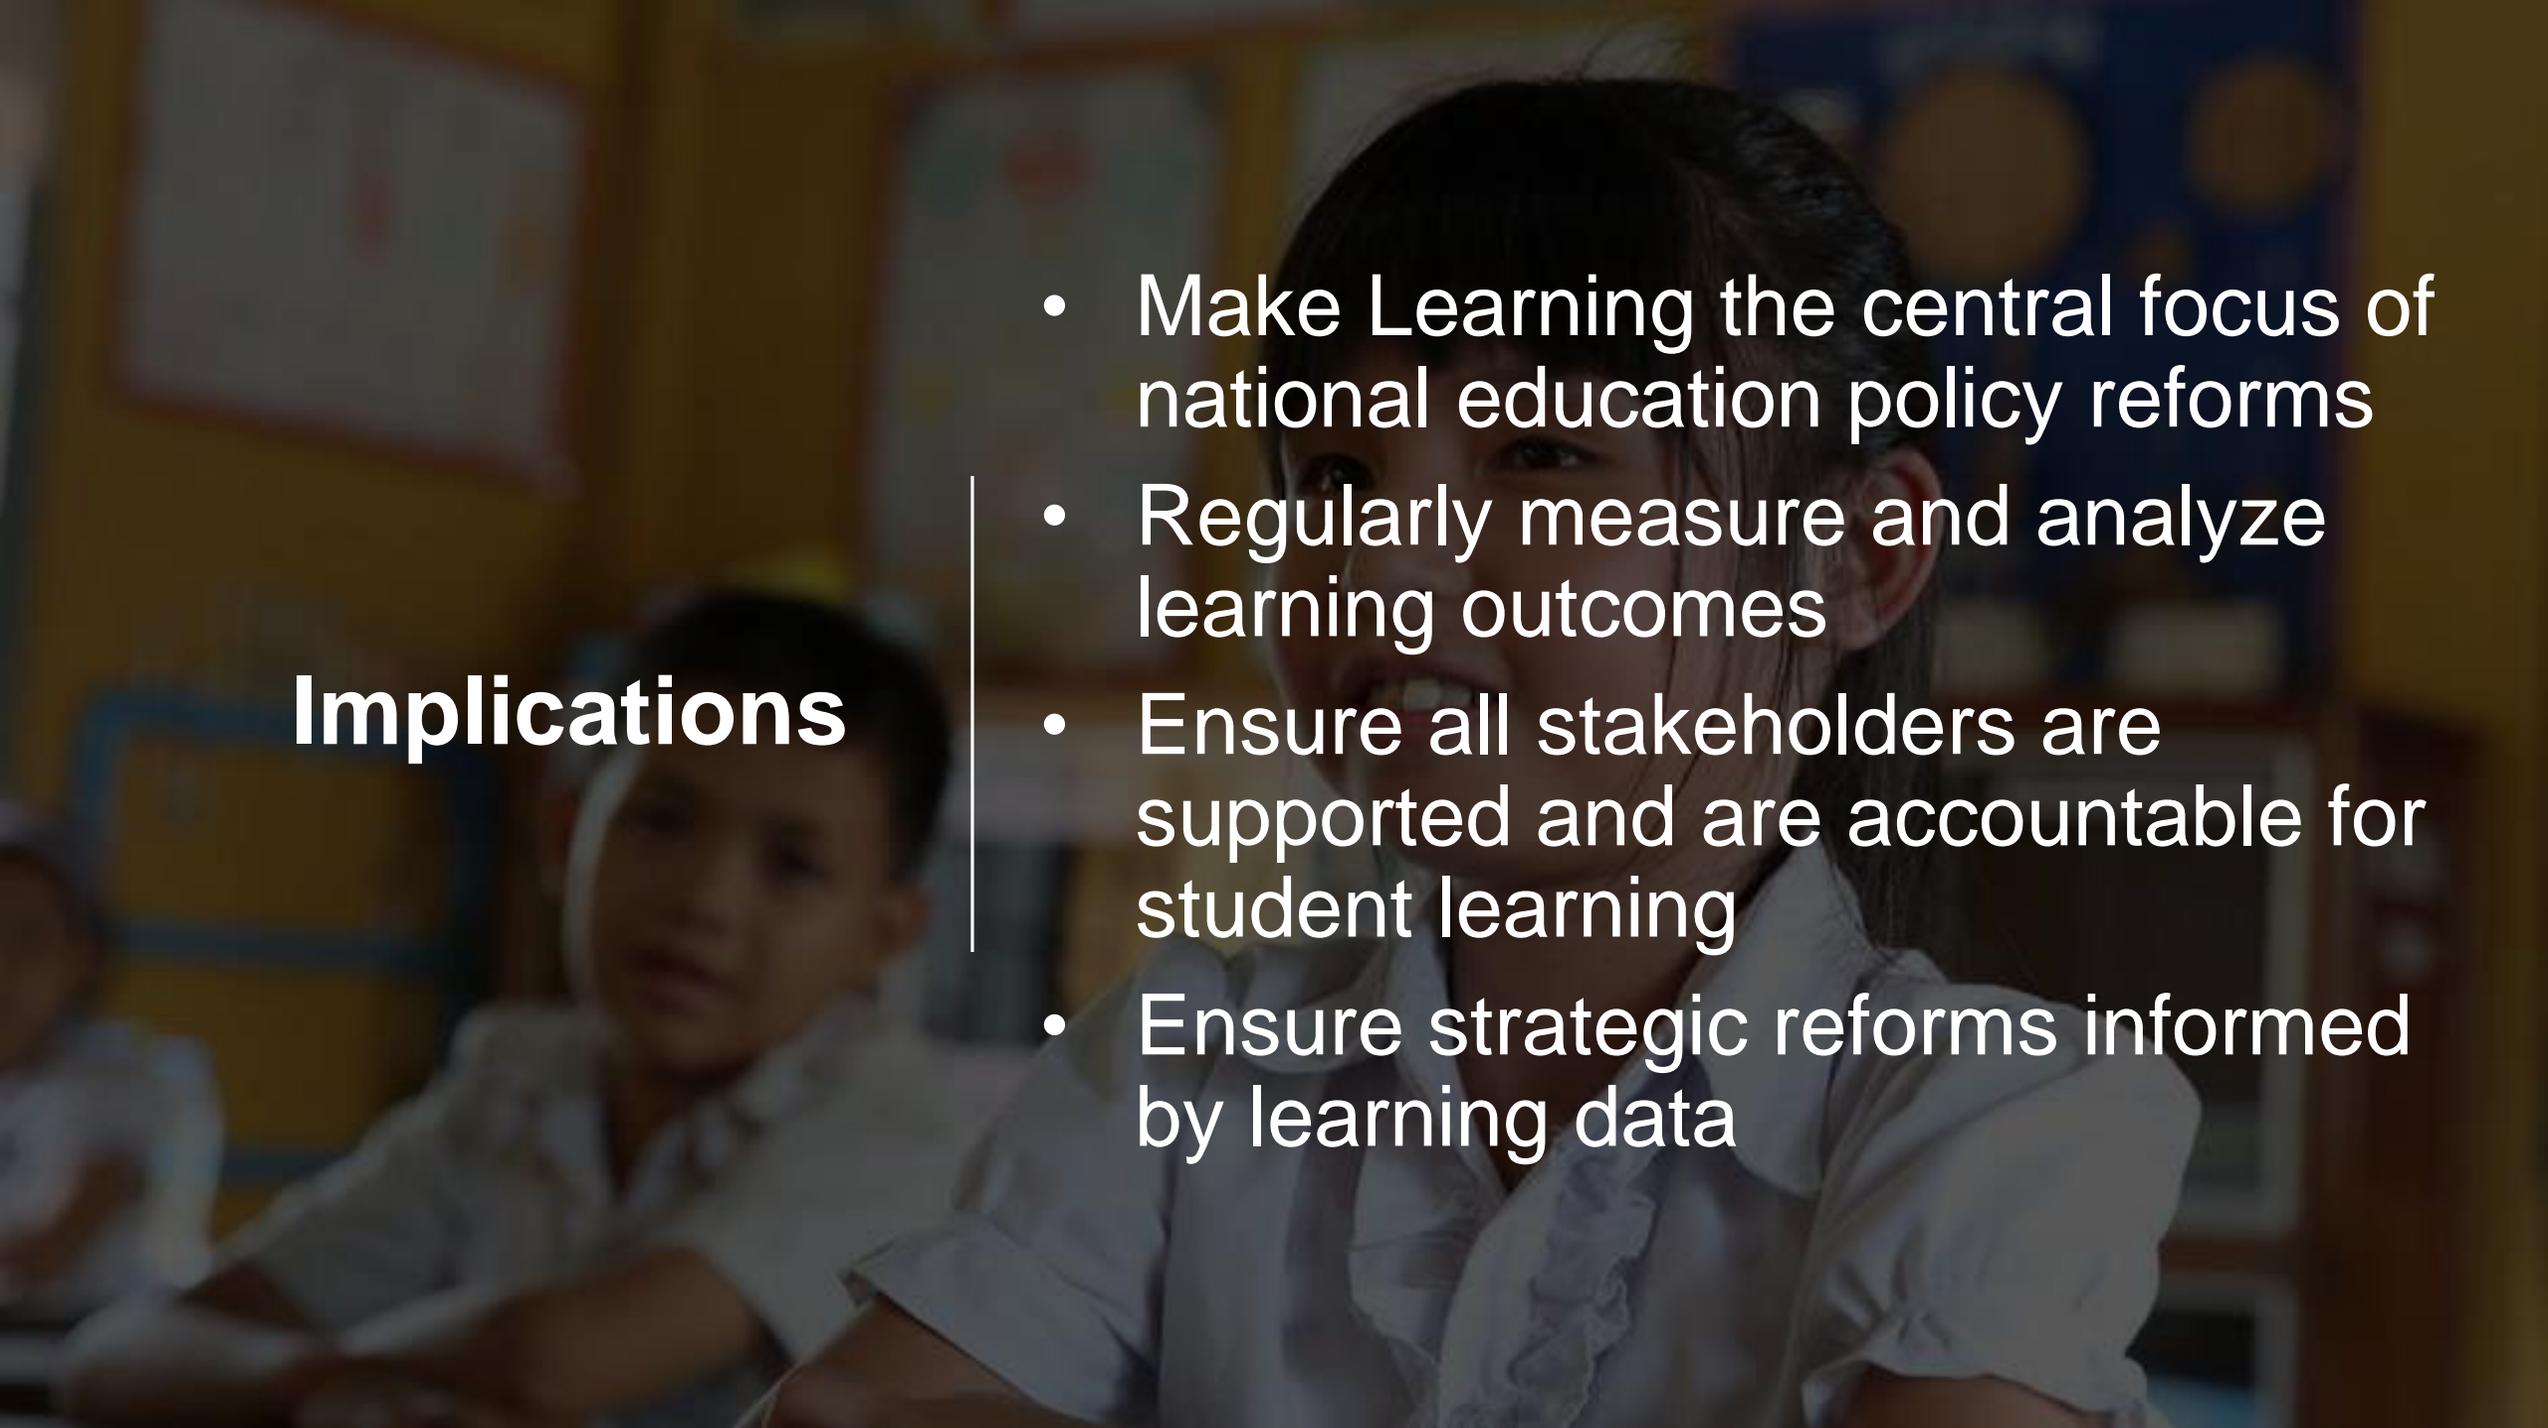

Gender and Enrollment

Gender and Learning

The background of the slide is a photograph of a classroom. In the foreground, a young girl with dark hair, wearing a white school uniform, is looking towards the camera with a slight smile. Behind her, another student is partially visible, also in a white uniform. The background is softly blurred, showing other students and classroom elements. The text is overlaid on this image.

Implications

- Make Learning the central focus of national education policy reforms
- Regularly measure and analyze learning outcomes
- Ensure all stakeholders are supported and are accountable for student learning
- Ensure strategic reforms informed by learning data
